

COMMUNITY CHARTER

"We Own the Health of Our Community"

Introduction:

Through the "We Own the Health of Our Community" initiative, community leaders are collaborating in a cross-sector approach that engages the broader Glendale community in working together to accelerate health-status improvement. By working together in a collaborative effort to address and resolve the growing health risks facing our community, this initiative is helping local organizations collectively accomplish what we are not able to achieve separately.

Purpose:

We, the Charter Signatories, have endorsed this effort to own the health of our community. This means that we support Glendale Healthier Community Coalition's (GHCC) current focus on reducing the diabetes and obesity health risks. This support includes raising health-risk awareness among our employees, staff, members and colleagues, while appropriately maintaining confidentiality. It also means creatively inspiring healthy behavior and encouraging those with health risk to reduce their risk and seek medical assistance as needed. We further support GHCC's historical and ongoing commitment to systematically develop and promote efforts that address our community's shared health concerns.

Signatories April 6th, 2017
